

## Satellite Dish Installation Request Form

Soldiers on Fort Jackson are authorized to install personally purchased satellite dishes at their homes. The following provisions must be adhered to:

1. Only dishes approximately three (3) feet in diameter are authorized.
2. Dishes will only be mounted in the rear of buildings on a free standing pole. No dishes will be installed on roofs, fences, grounds or on buildings.
3. Dishes will not be mounted within 10 feet of power lines coming into the home.
4. One entrance hole may be bored through the family housing structure to feed the cable to the interior. This hole must be at the point of the mounted dish and must be sealed around the cable to protect from moisture and insects. No exposed cable will be run on the exterior of the building.
5. No television antennas will be installed on family housing structures to receive local station.
6. The tenant will remove the satellite dish and all associated hardware and wiring, reseal the hole in the exterior and interior of the quarters and restore/repair any damages resulting from the installation of the dish before clearing housing. The tenant will be charged the cost of any necessary repairs due to satellite installation.
7. A request to install dishes may be obtained at the Community Management Office located at 5939 Thomas Court. The request must include the size and proposed location of the dish.
8. The Community Management Office is the final approving authority for request for satellite dish installation. No dish will be installed prior to final approval. Occupants can expect this process to take approximately 3 to 10 days.

It is recommended that occupants obtain final approval prior to purchase of a satellite dish. The AAFES in store refund policy requires that electronic merchandise be refunded with a receipt within 30 days of purchase.

---

I meet the above criteria and request permission to have a satellite dish installed on my quarters.
